

# Streamline Presenter

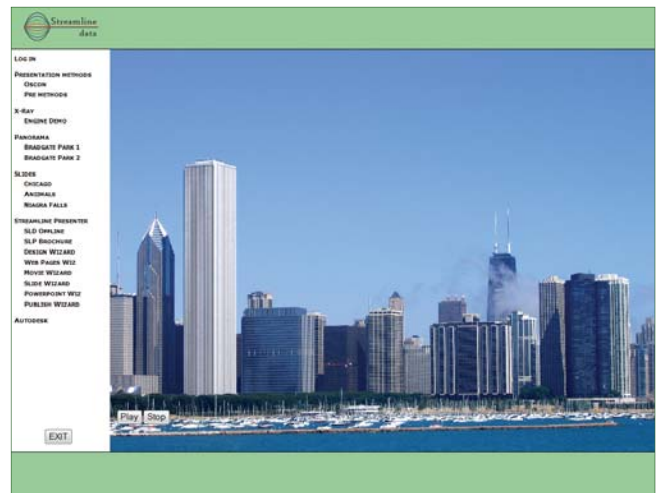

## Dynamic Extendable Presentations

### Streamline Presenter

Streamline Presenter is a CMS for presentations where you can build and modify multimedia presentations in minutes. Streamline Presenter is a multimedia box where you can organize all multimedia elements such as PowerPoints, Videos, Slides, PDFs and web elements and add them to a presentation menu.

With few easy steps you can create a design that will bring your brand forward to your audiences while showcasing products and services or giving information. Streamline Presenter is the most powerful marketing and communication tool and the only one of its kind on the market. It is suitable for the exhibition industry, company meetings, the retail and leisure industry, education and training, information campaigns, tourism and much more.

Streamline Presenter offers a very easy way to create, present and distribute your own multimedia presentations. With Streamline Presenter you will always have an up-to-date presentation that will meet the requirements of the next event. Once you have created or altered an existing Streamline Presenter presentation it can easily be distributed by CD or DVD, run from a pen drive or from a laptop with a projector.

### Streamline Presenter Web

Streamline Presenter Web is a CMS for websites and an extension module for Streamline Presenter. It provides a CMS solution that combines the powerful multimedia capabilities of Streamline Presenter with tailor made web design. In other words multimedia elements like Slides and Films from Streamline Presenter can be added to the user's website.

### Streamline Presenter Self running

Streamline Presenter Self Running is a Content Management System for self-running presentations and an extension module for Streamline Presenter. It provides a CMS solution for information displays in the exhibition area etc.
